ACCIDENT FATAL TO HARVESTER

Coroner's Jury Exonerates Driver of Car

Wednesday night as Mr. John Peterson was driving from the Lindquist farm to his home on S. W. of Section 22-45-10-44th, about ten miles S. W. of Irma, he met two men, Marshall Burns and Robert Gurney, of Durran, riding horses on their way home to the Firkus farm from Jarro. As the two riders approached Peterson, who was driving at from fifteen to twenty miles per hour, their horses were both out of control and as they went to pass the car the horse ridden by Durran plunged in front of the car and horse and driver were both thrown violently to the ground. Mr. Peterson who was unhurt did all he could to assist the injured man and took him to W. Lindquist's car, who happened along just after the accident happened, to Irma, where Dr. Greenberg found he had passed away on the way in.

Inquest at Irma Exonerates Driver
Thursday afternoon Dr. Maynes, Coroner and Corporal Collett of the Wainwright A.P.P. held an inquest at Irma. The jury composed of P. J. Hardy, A. E. Foxwell, R. Larson, Ross McFarland, G. A. Tripp and Jas. Hedley, viewed the body and listened to the evidence of Dr. Greenberg, Mr. A. Firkus, Marshall Burns, B. King and John Peterson, driver of the car that hit the deceased.

Dr. Greenberg, who held the post mortem gave the cause of death as shock and loss of blood. Mr. A. Firkus, with whom the deceased came to work on his threshing outfit on October 18th, explained that he only knew him as Bob; he arrived at Jarro the day he came to work for him, he thought the deceased had come from Biggar where he had been harvesting but he had no baggage or papers by which he could be identified. Also that he had worked a short time on the bundle wagon Wednesday afternoon but complained of tooth ache. He had told him to go to the house and see what his wife could give him but that the next thing he knew the man had taken a saddle horse out of the barn and gone to Jarro for tooth ache drops.

Marshall Burns, nephew of Firkus, accompanied the deceased to Jarro on another horse, explained how the horse ridden by Durran had got beyond control before meeting the car and how his own horse had run past the scene of the accident before he

CHURCH NOTICES AND ACTIVITIES

UNITED CHURCH NOTES

The services next Sunday will be at Paschenedale, Roseberry and Irma at the usual hours. All are cordially invited to any of these services, the topic will be "A Worldwide Commission."

The visit of Miss Winnifred Gilhooly of the Religious Education Council of Alberta was greatly enjoyed. In addition to her addresses on Saturday last to mothers and girls, she gave addresses at Albert and Alma Mater which were most inspiring. We surely hope to have other opportunities of hearing her messages.

Last Sunday was World's Temperance Sunday, and the sermon in the evening dealt with the theme of the right use of liberty. Two thoughts are worth pondering in this connection: the first is, "He alone is free, who is free to do as he ought"; the second, "Liberty means the right to become our best." In dealing with the question of influence the pastor said that no man can settle the question of conduct and leave the problem of influence out.

The congregation at Albert are holding a fowl supper in the schoolhouse on Friday, Nov. 13th, a social evening will follow. Watch for further particulars.

ANGLICAN CHURCH

The Service will be held at the United Church on November 15th at 3 p.m. There will be a celebration of Holy Communion at this service.

Rev. A. M. Trendall, Vicar. The next W.A. meeting will be held at the home of Mrs. H. Carter on November 10th at 2:30 p.m.

could get it stopped; also that he thought the deceased's name was Gurney or Durran.

Mr. B. King, who was also employed on the Firkus outfit, swore that he owned the horse ridden by the deceased, also that the horse was very high strung and whenever it was accompanied by another horse it would try to run away and that it had run away with him several times. He also told that he had heard the deceased say that he had been a taxi driver and had done considerable wrestling in Edmonton where he had lived all his life, or for twenty three years.

After considering the evidence the jury brought in a verdict of accidental death.

Canadian Engineer Inaugurates Radio System in New Waldorf Hotel

Paul E. Demers of the Radio Laboratory staff of the Northern Electric Company in Montreal, and well known in radio broadcasting circles throughout Canada was selected to inaugurate the centrally operated radio receiving system specially developed in the Bell Telephone laboratories, for the New Waldorf-Astoria Hotel which was opened in New York this month. Mr. Demers is here seen receiving the first "speaker" for use in his suite.

MEMORIAL SERVICE ON NOVEMBER 11TH

A Public Memorial Service will be held in Kiefer's Hall, Irma, on November 11th at 10:45 A. M. All veterans are asked to attend this service and the "Fall In" at 10:30 a.m. Sharp at Cde Yeend's, next to Fair Grounds, all Medals to be worn, when we will then parade to the Hall. The Public are specially invited to attend this service. A Pipe band will be on parade and play to the Hall. The Rev. Mr. Trendall of Wainwright will conduct the service, assisted by Rev. Mr. Geeson of Irma. The "Last Post" will be sounded by two of the comrades.

REMEMBRANCE

In proud and loving remembrance we celebrate this month, November 11th, Armistice Day. Whether it be amid the surging throngs of a great metropolis—under a northern sky—at some lonely outpost, out on the prairie or under a southern sun, this day will we hold with reverence. "They shall not grow old, as we that are left grow old, Age shall not wither them, nor the years condemn. At the going down of the sun, and in the morning, We will remember them."

In Flanders Fields

In Flanders' fields, the poppies blow
Between the crosses, row on row
That mark our place; and in the sky
The larks, still bravely singing, fly
Scarce heard amid the guns below.
We are the dead. Short days ago
We lived, felt down, saw sunset glow
Loved, and were loved, and now we lie
In Flanders' fields.

Take up our quarrel with the foe!
To you, from falling hands, we throw
The torch. Be yours to lift it high!
If ye break faith with us who die
We shall not sleep, though poppies blow—
In Flanders' fields.

LT.-Col. John McCrae
France 1917.

MOTHER IDENTIFIES EDMON- TON YOUTH KILLED AT IRMA

Body of a young man, killed Wednesday night when a car struck his saddle horse near Irma, Alta, was identified Monday as Robert Sherrett, 23, of Edmonton. His mother and father, Mr. and Mrs. William Sherrett, reside at Huron farms, 10350 96 st.

Identification was made by Mrs. Sherrett, who went to Alberta provincial police headquarters to see a picture taken of deceased after death had occurred.

A coroner's jury at Irma absolved John Peterson, driver of the car, from blame. The horse which Sherrett was riding, was out of control at the time and jumped in front of the oncoming auto. Its leg was fractured and it was shot.

POPPIES TO BE SOLD IN IRMA

The Irma Branch Canadian Legion B. E. S. L. are conducting a Poppy Campaign. Poppies are being sold in the surrounding schools and will also be sold in Irma a few days before the anniversary of that Memorial day, November 11th. Any one wishing to order a Spray or Wreath can get particulars and prices of same from either W. E. Irwin, Sec. Treas., or Mr. R. Stone at Stones Bakery, Irma, who will be pleased to accept orders for Sprays or Wreaths.

Many people ask the object of this campaign and where the profits go so I attach a copy of the campaign objects, issued by our Dominion Command at Ottawa:

- Objects of the Campaign**
1. To pay tribute and bring back to the memory of all citizens the men who sleep beneath the poppies in France, that due remembrance is shown in some tangible form on November 11th each year.
 2. To provide employment for disabled ex-service men engaged by the Government in Veterans' Shops.
 3. To create a small fund in the district where poppies are sold which can be applied as relief for any deserving case.
 4. To help provide funds for taking care of genuine adjustment cases of widows and dependents and disabled returned men.
- (School children should be taught to memorize these four benefits of the campaign and be able to repeat them in their homes.)

AN ANNOUNCEMENT

We wish to notify the Farmers and others in the district that in a few days we expect to have installed a New Hammermill for Custom work. This is a new method of grinding feed and is far ahead of the plate grinder.

This mill will grind anything from Oat Sheaves to Flax. The kernels are absolutely smashed and therefore made more digestible. It will grind wheat into whole wheat flour. The Flour or Chop comes from the mill cold, therefore it will keep and not sour; the plate grinders will not do this. It will do fast work and the price will be reasonable. So hold your chopping a few days and give this mill a trial.

V. HUTCHINSON

Blacksmith and Massey Harris Agent

IRMA L. O. L. 2666

Held a very well attended meeting on October 29th. Three new members were initiated in the Orange degree. The following visitors rendered valuable assistance in the degree work:

Bro. H. C. Montgomery, P.M. 1987 Gilt Edge; Bro. J. E. Wilkins, P. M. 3086 Wainwright; Bro. O. H. Lilly, P. M. 3086 Wainwright; Bro. A. H. Lilly, P. M. 3086 Wainwright.

F. W. Watkinson, R. S.

WEEKLY REVIEW PROV. MARKETS

BEEF—Trading has been fairly brisk at Edmonton this week, particularly on female offerings, while prices held about steady. Choice heavy steers brought \$4@4.25; choice light \$4.25@4.75; good \$4@4.25; medium \$3.25@3.75; common \$2@3. Choice heifers at \$4@4.25, with good kinds \$3.75@4.

FEEDERS, STOCKERS—Practically all offerings finding a ready demand, while the better grades are turning over exceptionally well. Feeder steers making \$3@3.75; stock steers \$2.50@3.75; stock heifers from \$2.50@3.50, and stock cows \$1.75@2.50.

HOGS—Edmonton market also easier this week, being \$25@30c down compared to last week's quotations. Bacon selling at \$4.25@4.35, fed and watered, while select brought \$4.75@4.85, and butchers \$3.75@3.85.

SHEEP—Trading slow at Edmonton, with prices unchanged. Yearlings making \$3@3.4; ewes \$1.50@3.3; lambs \$4@4.6.

POULTRY—Fowl, No. 1, over 4 lbs., 9@10c; No. under 4 lbs., 7@8c; No. 2, 5@6c, and roosters, No. 1, chicken, over 4 lbs., 10c; No. 2, 8c.

EGGS—Undertone of market very firm as moderately active demand exists and receipts are limited. B. C. pullet and Edmonton eggs reported on Calgary market. Extras and firsts unchanged to slightly higher, with former 26@30c and latter 24@27c; second, steady at 12c.

HAY—Offerings from country increasing as harvesting draws to a close, but no demand so movement is light. Quality only fair. Timothy quoted \$12@13 and upland \$9@9.50 per ton at country points.

FEED OATS—Demand drab and offerings only arriving re required. Price steady at 22@23c. With most sales at the former price. **GREEN PEA**—Oat harvest constitutes bulk of supply in this market, and they are meeting active demand. Price steady at \$9@10 per ton, delivered.

C. G. I. T. NOTES

The Irma C. G. I. T. girls had a Halloween party in the Church on Friday, October 30th. The church was nicely decorated with witches and cats and over the lights were lanterns. At seven thirty the girls all assembled at the church and at eight the visitors arrived. The first part of the evening was spent by playing 'pranks' on the guests. After everyone decided that enough games were played, supper came on the scene. The party broke up about ten thirty. The girls hope that their guests had as good a time as they did themselves.

LADIES AID

The Ladies Aid held a social afternoon at the home of Mrs. James Fenton on Thursday last. A few last minute arrangements for the Bazaar was made. The main feature of the afternoon being a speech of regret and good wishes with the presenting of a suitable gift from the Aid to Miss Sellars. Mrs. Tripp in a few well chosen words told of how the Aid and Church would sorely miss Miss Sellars as a member and very willing worker, but that we all wished her the best of joy and happiness in her new home.

VIKING PLAY

The Ladies Aid have made arrangements with the Viking players to present their play "The Family Upstairs" in Kiefer's Hall on Friday evening, November 13th. We are told this play was presented on the Ontario Chautauqua platform last summer and promises to be a real treat. Those who saw the Viking players a year ago will be looking forward to seeing them again on Friday evening, November 13th. Admission 50c, 25c and 15c.

NEW STORE OPENS

An addition to the Irma business section is the store of the Irma Trading Co. Limited, which opens for business this week. The manager of the new venture is Mr. E. Lechett, who is putting in a fresh stock of groceries and supplies. Some specials are quoted in an advertisement which appears in this issue of the Times.

BOXING PROGRAM FOR SAT. NOV. 14

A boxing program that promises to be of considerable merit is being staged in the Elks hall, Viking, on Saturday evening, November 14th, commencing at 9 o'clock sharp. Chas. Clark, of Irma, is the promoter and is lining up a likely-looking lot of mitt artists.

For the main bout, Billy Barton, of Calgary, will exchange wallops with Phil Befus, of Stettler. These boys weigh in at 160 lbs. and have a good reputation with the padded gloves. Neither have been seen in action in the local ring but it is reported they both pack a real punch. This event is scheduled to go ten three minute rounds.

As a semi-final attraction Ivar Nore, of Bruce has been matched with Mel Prosser, of Irma. This is a six round go and both lads are willing mixers.

Another preliminary that will be looked forward to is a four-rounder between Young Myers of Irma and Tommy Greenwood, of Kinsella. Myers holds a decision over Greenwood, but Tommy feels he can reverse it, so it has much promise as a real go.

Young Sloan of Viking has been matched with Art Baker of Irma. Baker is an unknown quantity in these parts but we hear some glowing accounts about him. These lads will step four rounds.

Other certain raisers will be arranged before the day of the bout. Ring side seats will be sold for \$1.50 and rush seats \$1.25, including tax. Look for large posters and prepare to come and sit in on a good boxing show.

The winner of the main bout is to be matched with Ernie Zurich, of Edmonton, at a later date.

NOTICE

The Council of the Municipal District of Battle River No. 423 have issued an order that all Farm Implements must be removed from all Road Allowances in this Municipality without delay.

Thos. G. Dark, Eyesight Specialist of the Edmonton Optical Co., will be at Irma Hotel Monday, November 9th after 5 P. M. Eyes tested, Glasses fitted and Guaranteed. Prices have been reduced.

Coal

See us for your Next Load of Coal. The kind which does not clinker; produces abundance of heat and burns a long time with the minimum of ash.

We used the Coal during the winter of 1930-31 both in the Kitchen Stove and Furnace and found it more satisfactory than other coal selling at \$2.00 more per Ton.

If you want a small quantity we have it already in sacks of 100 to 150 lbs.

Set Your Own Standard

Most of us have seen the cartoons and read the stories appearing under the title "Keeping up with the Joneses." We have laughed over them, but at the same time exclaimed aloud, or murmured to ourselves, "What fools!"

Calmly facing, and closely diagnosing the situation which confronts thousands of us today as individuals, and all of us collectively as represented by our municipal, provincial and federal governments, must we not admit that no small part of our present financial problems are the result of conditions created by an attitude analogous to that portrayed in "Keeping up with the Joneses?"

The acuteness of our present day situation may be due to other causes quite beyond our control—such as protracted drought, and consequent crop failure, leading to unemployment in urban centres—but would we not as a people, individually and collectively, have been able to withstand these shocks if, when times were prosperous and business active, we had not lived up to, and in many cases far beyond, our current income in a desperate race in which each and all were striving to keep up with somebody else?

Looking back—and it is in times like these that people are in the mood to "look back," take stock and give heed to things that at other times when everything is forging full speed ahead they will not stop and consider—is it not possible to see that we indulged in expenditures which our actual position did not warrant but into which we plunged because of a false vanity that we must keep up with somebody else?

The old motor car although still serviceable was not good enough because somebody else had bought a new, more up-to-date, faster car, the simple, refreshing, health-giving holiday at a near-by lake we had enjoyed for years had to give place to an expensive trip to the Coast, or a winter in California, or Florida, or some Eastern city because somebody else had followed such a course; or because somebody else sent their son or daughter to university, we must do likewise, even though our boy and girl might not have similar tastes or inclinations or aptitude for the higher degrees of learning.

And these traits of character in the individual, naturally have found expression in the policies of the governments we have created. Because older established, more populous and wealthier provinces, states and countries have, through the expenditure of millions of dollars, created great systems of permanent, all-weather roads, why must we do the same although still young, weak and not yet wealthy as a community. Not only roads, but our schools, our public buildings, all our public services had to be the equal of those to be found anywhere else. As individuals, as electors, we demanded these things, and our governments were forced to comply with the demands or give way for those who would. We were determined to keep up with the Joneses of the whole world.

As a result the factories of the world were busy turning out not necessities alone but enormous quantities of luxuries at a fabulous cost. Stocks and bonds of these inflated industries mounted in value to dizzy heights. Everybody bought them with a view to amassing more money in order that they might buy still more luxury. Sooner or later a collapse had to come, and the Joneses of the world and their vast army of imitators are now in difficulty.

There is a lesson all may well take to heart at this time. It is this: Rightly or wrongly—and wrongly we believe, and certainly wrong in the vast differences which exist—wealth is unevenly divided, income and earning power vary greatly from one person to another, and at different periods of a person's life. One man's standard of living and expenditure cannot safely be accepted as sound and proper by another man. While our present distribution of wealth continues, one man's loose change will be another man's extravagant folly.

Like everything else in this changing world, the social order is changing. Furthermore, it is the right and privilege of every man and woman to work for a change along lines he or she considers to be better, more just; with this limitation, however, that they must consider and respect the rights of others just as they expect their rights to be respected. Self-interest alone must not be our guide, because, in the final analysis, insistence of self-interest alone means self-destruction. And this is true of nations just as truly as it is of individuals.

George Washington once said: "Economy makes happy homes and sound nations—in it lie deep." Far better to follow this sage advice than to indulge in the heart-burning dissatisfaction of continually trying to keep up with the Joneses.

New Appointment

Dr. C. N. Bell, Of Grain Standards Board, Has Been Superannuated

Dr. C. N. Bell, first secretary of the Winnipeg Grain Exchange, and recently the secretary of the Western Grain Standards Board and the Grain Appeals Board, having reached the age limit for civil servants, has been superannuated and is succeeded in his position by Major C. J. Drake, who has been transferred from the Canadian Government Elevators at Fort William.

Major Drake is well known in Winnipeg, having held a secretarial position in the Manitoba legislature for a number of years.

British women claim to live longer than Americans, whose death rate between the ages of 25 and 64 is more than 30 per cent. higher than that in Britain.

The chemical industry is one of the most important in Poland.

Suspect Radium Paint Is Causing Cancer

Workers Have Been Developing Disease In Increasing Numbers

Clues to the cause of cancer in radio-activity are disclosed in the final report of the New Jersey radium clock dial painters' deaths.

Lately some of these victims have been developing cancer in increasing numbers, and the report discloses the possibility that now unrecognized sources of radio-active bombardment in the human body may cause cancer.

The dial painters have a form of radium emanations never before found in human beings. These are "alpha particles," heavy nuclei of atoms, travelling 12,000 miles a second, which in medical use of radium are screened off by the tubes encasing the radium.

The report is made by Harrison S. Martland, M.D., of the Department of Pathology of Newark City Hospital, in the American Journal of Cancer.

Of 18 deaths to date among women in the New Jersey plant, he says five died of cancer. He finds a sixth cancer death due to swallowing radium paint by a woman who worked on New York and Connecticut clock factories. Four more "dial" cases suspected of developing cancer are under observation.

"When your wife starts to talk does she know what's stop?"
"I don't know yet; we've only been married nine years."

Building of a railway to the top of Ben Nevis, Scotland's highest mountain, is being urged.

Becoming Serious Matter

Gasoline Being Stolen From Government Caches In North

Hundreds of gallons of gasoline have been stolen from government gasoline caches scattered in various parts of Manitoba, Saskatchewan, and the Northwest Territories during the past two years and investigations are underway by the R.C.M.P.

The theft of a few gallons of gas does not seem a very serious offence, but to the R.C.A.F. planes in their travels across the bush country it may easily enough be a matter of life and death.

Expecting to find a cache of hundreds of gallons to carry them back to civilization or on to the next stopping place, pilots frequently have found the supply buildings broken into and only a few scattered tins of fuel left.

Gasoline that cost 35 cents a gallon in this city is eagerly purchased for \$9 and \$10 a gallon "north of 57."

The cost of freighting the fuel explains the difference.

Last winter a record price of \$15 a gallon was paid by a northern mining company for transporting gas to Reindeer Lake in Northern Saskatchewan.

Hard Times In Labrador

Twelve Thousand Families Are Reported To Be Facing Starvation

Unless prompt assistance is forthcoming some 12,000 families face starvation this winter in the Button Bay district of Labrador, according to a report presented to the Quebec Government by Rev. A. S. Leomoyan, provincial school inspector and Anglican missionary of the stricken district.

This condition was brought about by the failure of the cod fishing industry this year.

The report was considered by a cabinet meeting, at the conclusion of which Premier L. A. Taschereau said the Quebec Government will do something as soon as possible to alleviate the situation.

"We would naturally like the Dominion authorities to go to \$50 with us in providing this relief," he added.

DRAPERIES MADE NEW

"When we resumed housekeeping a month ago I found my draperies had become creased from packing. I hung them out on the line, hoping to remove the creases. Then I forgot them. The result was they became badly faded and sun-burned."
"I was heart sick until the happy thought struck me to dye them. I used Diamond Dyes, and as I used Diamond Dyes they look gorgeous and new. I have never seen easier dyes to use than Diamond Dyes—they use either for tinting or dyeing—when never take the life out of cloth as other dyes do."

Mrs. J. E. T. Montreal.

A New Product

Making Of Wool Leather Is Closely Guarded Secret

The newest leather isn't leather at all. It is nothing more or less than wool. Wool-leather has been developed at the headquarters of the British Wool Industries Research Association in Leeds, England, and the process is a closely guarded secret. It looks like leather, wears like leather, is waterproof, and can be produced remarkably cheaply. The new wool-leather is excellent for boot uppers, furniture, motor coats, and for the upholstery of cars, buses, and railway vehicles. Not the least of its advantages is that it is easily produced in any desired shade or colour.

Proud Of Record

In the province of Vernaland, Sweden, 164 farmers have received diplomas testifying to the long hereditary tenure of their lands. The record seems to be held by a family at Eda, which has farmed its lands since 1470, but another family, at Norda Entenud, has held a farm since 1480. The Swedish farmers take great pride in their family records and the new diplomas are highly prized.

The Royal Aero Club, of England, exclusively a men's club, is to admit women as guests only, and may give them full membership later.

It is useless to kick for a discount when called upon to pay the debt of nature.

Acid Stomach

Completely Relieved By Famous Vegetable Pills

Mr. Frank C. of Blackburn, writes: "I have suffered long and severely from acid stomach and constipation, but since been relieved to try your wonderful Carter's Little Liver Pills. I can eat anything. Dr. Carter's Little Liver Pills are no ordinary laxative. They are ALL VEGEABLE and have a definite, valuable tonic action upon the liver. They cure Constipation, Indigestion, Bilelessness, Headaches, Poor Complexion. All druggists. 25c & 75c red boxes."

Achieved Great Success

Lord Byng Restored Public Confidence In Scotland Yard

Canadians will read with warm satisfaction the tribute paid to Lord Byng by the London Times on his relinquishing the office of Commissioner of the Metropolitan Police Force. The great popularity which his lordship gained with the soldiers under his command on the battlefields of Europe was shared by the citizens of this country when he became Governor-General of the Dominion. He was liked for his personal qualities as much as he was admired for his ability and strength of character. When he was appointed to Scotland Yard there were some who wondered whether military qualifications were the right credentials for a police chief. Unfortunately Lord Byng has suffered much from ill-health during his tenure of office, but he has succeeded in achieving a great success in the position. Certain happenings had marred the wonderful record of Britain's Metropolitan Police Department, and it was to no secure that the great commander was called. He undertook the task with his usual may be said to long enjoy his well-earned retirement! He has shown himself in peace and war a true commander and a great administrator. Quebec Chronicle-Telegraph.

Persian Balm imparts a rare charm and distinction to the woman who uses it. Fragrant as a flower, deliciously cool to the skin, it always results in complexioned delightfully young and lovely. Indispensable to every dainty woman. As a powder base for oily-textured skins or as a beautifying lotion, it is unrivalled. Tones and stimulates the skin. Recommended also to soften and make the hands flawlessly white.

Recipes For This Week

(By Betty Barclay)

CORNED BEEF LOAF

- 1 package lemon-flavoured gelatin.
- 1 cup boiling water.
- 1 cup meat stock, or 1 cup water plus 1 heaping cup of 4 teaspoons beef extract.
- 1 tablespoon Worcestershire sauce.
- 1 teaspoon paprika.
- 3 cups cooked corned beef, ground.
- 1 tablespoon onion, grated.
- 1 tablespoon prepared mustard.

Dissolve gelatin in boiling water. Add meat stock, Worcestershire sauce, and paprika. Chill. When slightly thickened, fold in corned beef, onion, and mustard. Turn into loaf pan. Chill until firm. Unmold. Serve in slices on crisp lettuce. Garnish with sliced hard-cooked eggs or tomato wedges. Serves 10.

Quince Honey

- 6 large quinces.
- 4 large sweet apples.
- Juice 2 lemons.
- Sugar.
- 3 pints boiling water.

Pare the quinces and apples, and grate them. Measure the pulp and use three-fourths as much sugar as pulp. Pour the boiling water over the sugar and stir it until it is almost dissolved. Add the fruit pulp and lemon juice, and cook the mixture until it is clear. Pour it into clean, hot glasses and cover with paraffin. It will have the consistency and appearance of honey.

Don't be without Douglas' Egyptian Liniment. Keep it always handy. Relieves toothache, neuralgia, sore throat, quinsy, and croup. Invaluable for burns, sores, Barber's Itch and Ringworm.

Crowds Hear Einstein
A huge crowd battled with police to hear Professor Albert Einstein, father of relativity, outline a new scientific theory, even though the theory concerned such a highly technical subject as the use of vectors in three-dimensional space, something understandable only by very competent mathematicians.

"Who was Samson?" The scholar aspirant bit his pen, looked at the ceiling for inspiration, and wrote: "Samson was a strong man appointed to entertain the Philistines. He brought the house down."

Blooming varieties of begonia like plenty of sunshine, whereas varieties with spotted, leaves thrive in north windows.

Lack of iron in the diet rather than lack of vitamin "G" may be the cause of pellagra.

Drought has done considerable damage to the flax crop in Italy.

Mass Purchasing Needed

Production Has No Value Unless Goods Can Be Bought

Just as we had found out about all we needed to know about mass production, the whole thing was spoiled by our not knowing enough about mass purchasing! We believed so sincerely that he was the real benefactor of the race who made two blades of grass to grow where formerly there grew, but one that we lost our heads completely as to the other real benefactors. Production is all very well, but there is little value in products that meet no real want. The problem of production was solved by the wise old teacher who warned his scholars that when one had food and clothing and shelter that he should be content.

Mass production had made it very difficult for some folk to face any emergency. We have heard of folks, for instance, who, year in and year out, did nothing but fill a grease cup or move a lever. Now there are no grease cups to fill and there is no end served in moving the levers. But cup filler and lever mover are now hungry.

Make Drastic Cuts

United States Naval Expenditures To Be Reduced

With strokes cutting more than \$50,000,000 from its 1933 expenditures, the United States navy has eliminated its less important activities and has sharply curtailed many that it valued highly.

More than 3,000 civilian employees will be laid off. More than 4,000 sailors and marines will be taken from the rolls.

The Boston, Mass., and Charleston, S.C., navy yards will be closed, and so will the operating base at New Orleans, La., the naval station at Newport, Rhode Island, and the naval ammunition depot at Lake Denmark, New Jersey.

Ready-Made Medicine.—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thomas' Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable for scaling, neuralgic bruises, sprains it is unsurpassed; while for cuts, sores and the like it is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

Canada a Good Country

Times may be "hard" in Canada in some lines, but generally speaking, this country can hold its head up with any of them when it comes to business integrity and solidity. Naturally, we cannot hope to be rid of those who are always tripping over their lower lip, but these, fortunately, are in the minority. But how that minority can sometimes broadcast.

World's Poultry Congress

Preparations Being Made To Entertain Delegates To Rome Convention

Delegates to the Fifth World's Poultry Congress being held in Rome, Italy, in 1933, are assured an exceptional opportunity for visiting. Not only will they "see Rome" during Congress week but they will be guests of the Government of Italy for an eight-day tour of the country, during which visits will be made to such interesting and historic spots as Leghorn, Florence, Pisa, Perouse, Ancona, Bologna, Ravenna, Milan, Como, and Venice. Canadian delegates will return by way of Switzerland, Germany, Belgium and France en route to Great Britain. Going routes being considered include via Paris and the South of France, via Gibraltar and Old Spain, via the Riviera, and by steamer direct to Naples with a day at Palermo. F. C. Elford, Dominion Poultry Husbandman, is again giving an active lead to Canadian participation and will be glad to hear from anyone interested in attending the Rome Congress.

Telegraphing Flowers

Television May Enable Purchaser To Actually See The Flowers Selected

The sending of "flowers by telegraph" has for some years been a great convenience to many people, although they have been obliged largely to leave the selection of the bouquet or plant to the florist. But, according to information given out at the recent convention of the Florists Telegraph Delivery Association, television will soon enable the customer actually to see his selection of blooms and supervise their arrangement before delivery is made. Perhaps the time may come when a customer can get a whiff of their fragrance.—Christian Science Monitor.

Will Ask Peat Survey

The Alberta Government will make a request to the Dominion Government that Dr. A. Anrep, peat moss specialist of the Federal Department of Mines, be permitted to make an extensive survey of peat moss deposits in Alberta next year. The step is being taken with a view to ascertaining the commercial qualities of Alberta peat moss for insulating and agricultural purposes.

A man's reputation is made as much by what he leaves unsaid as by what he says.

People who are too old to learn have outlived their usefulness.

Owners of radio sets in Portugal are to be taxed \$2.25 a year.

"FATIGUE?"

I just postpone it!"

"No, I don't have 'nerves.' You can't have them, and hold this sort of position. My head used to throb around three o'clock, and certain days, of course, were worse than others."

"Then I learned to rely on Aspirin."
The sure cure for any headache is rest. But sometimes we must postpone it. That's when Aspirin saves the day. Two tablets, and the maddening pain is gone until you are home. And once you are comfortable the pain seldom returns!

Keep Aspirin handy. Don't put it away, or put off taking it. Fighting a headache to finish the day may be heroic, but it is also a little foolish. So is sacrificing a night's sleep because you're an annoying cold, or a night's throat, or grumbling tooth, or neuralgia, or neuritis. These tablets always relieve. They don't depress the heart, and may be taken freely. That is medical opinion. It is a fact established by the last twenty years of medical practice.

The only caution to be observed is when you are taking Aspirin. Don't take a substitute because it will not act the same. Aspirin is made in Canada.

Made in Canada

Value To Canadian Agriculture Of The Chemical Work Carried On By Our Experimental Farms

For a period of more than forty years the division of Chemistry of the Dominion Experimental Farm system has been in close contact with the Canadian farmer. This has been brought about by the issue of reports and bulletins, by lectures and addresses, personal interviews and to a still greater degree by a voluminous and ever-increasing correspondence.

The information so disseminated is largely the result of investigation and research which are based upon the application of the science of chemistry to practical agriculture, and these constitute the main work of the division.

A large number of soil samples are received for examination from farmers scattered throughout the Dominion. In the report of analysis to the sender, advice is given with respect to manures, soil amendments and suitable fertilizers, etc., in this way alone hundreds of farmers every year are directly benefiting from this service of the division. From the results of carefully planned investigations the influence of continuous grain-growing has been determined and economic methods of maintaining the fertility of western prairie soils have been indicated. The extensive use of alfalfa and clover in present-day crop rotations is largely due to the early work of the division in which the manurial value of these legumes was demonstrated.

Recent years have witnessed an increasing use of fertilizers, especially in eastern Canada. Extremely valuable information with respect to the economic employment of fertilizers and liming materials has resulted from the investigation work carried on by the division on the several branch farms and stations.

Another important phase of the work has been the establishing of standards for the more important feeding stuffs. Some years ago there was widespread dissatisfaction over the variable quality of milling by-products. Many were loaded with screenings with consequent poorer feeding value; injurious weed seeds were frequently present, and middlings with a low fibre content, so necessary in pig-feeding, were difficult to obtain. Standards for bran, shorts, middlings and feed flour were set, regulations regarding adulterations by screenings passed and as a result there is on the market today standardized clean, high-grade wheat by-products. Similar work was done for packing house by-products, resulting in the vending of properly labelled material with guaranteed contents of protein, fat and bone-phosphate.

In the chemistry of wheat it has been shown that seasonal conditions—precipitation, temperature, etc.—have a greater influence on the quantity and quality of the gluten than does soil fertility. The valuation of newly introduced varieties has been another phase of the work. For instance, some years ago an effort was made by interested parties to distribute in the West a variety of wheat to replace Marquis and other standard varieties. Yields, appearance and even percentage of protein of this variety were satisfactory. Gluten determinations, however, showed this wheat to possess a soft, sticky, non-reassilient gluten, markedly inferior to that of such older varieties as Fife and Marquis. In consequence the distribution of this variety was discouraged.

Grain mixtures grown to produce high protein yields have been under investigation. As a result certain mixtures have been found which almost double the amount of protein per unit area formerly obtained.

The critical examination of a recently introduced scheme of pasture calls for special comment. This system involving close grazing accompanied by judicious fertilizer treatment, has produced a herbage

rich in protein during the entire growing season and has resulted, in some districts, in saving the purchase price of commercial feeds, during the summer.

Free analysis of well water has contributed towards the maintenance of hygienic conditions through the farming districts. Thousands of samples of well water have been analyzed, pollution, alkalinity, etc., detected and remedies suggested.

At one time the export trade in pork to Great Britain was seriously affected by extreme softness of the product. Investigation of this problem proved that the chief factors leading to softness in pork were the stage of maturity of the animals and the character of the feed—skim-milk in the ration possessing a correcting influence in the prevention of this undesirable quality.

The foregoing paragraphs present but a small proportion of the work of the division. These examples, however, may serve to emphasize the value to Canadian agriculture of the chemical work of the Dominion Experimental Farms.

WHAT NEW YORK IS WEARING

Illustrated Dressmaking Lesson Furnished With Every Pattern
Today's little dress delights in its smart simplicity. It is cut along lovely slim lines and therefore suitable for many figures. And it has a pert bow added to its tiny contrasting vest. It's remarkable how such an addition can be so charming.

The diagonal seaming at the front of the skirt is decorative and slimming too. The skirt is circular with moderate fullness.

A dark ground crepe silk print made the original.
Style No. 3219 may be had in sizes 14, 16, 18, 20 years, 36, 38 and 40 inches bust.

Sheer silk georgette crepe, plain flat crepe silk and wool and silk crepe novelties have stunning effects in this model.
Size 16 requires 3 1/2 yards 39-inch with 1/2 yard 39-inch contrasting. Pattern price 25 cents in stamps or coin (coin preferred.) Wrap coin carefully.

Tarnish on tin cooking vessels makes them more efficient by holding, rather than reflecting, heat.

The citrus growers of California have a \$25,000 insect laboratory.

Should Be Two Years

One Year Record For Dairy Cow Not Fair Test Of Value

Too many dairymen are prone to judge a cow's value by a one-year record, instead of by her total production over a period of years, says K. S. Morrow, associate extension service dairyman of the New Jersey Agricultural Experiment Station. He says it requires approximately two years of milk production for a good cow to pay off the charge against her for rearing or purchase, after pointing out that it costs money to buy a cow or to rear one to a productive age.

"Whether or not a cow will be highly profitable depends on how many years she continues to return a good profit over the cost of her maintenance," Mr. Morrow emphasizes. "One ten-year-old cow will produce as much profit above all expenses as three cows that are kept in the herd until only 6 years old, assuming the average yearly production is the same for all animals."

"If the cows freshen at 2 years of age, the dairymen would have to milk three cows for four years to equal returns for one cow milked eight years. Care of three cows requires 50 per cent. more labour. The investment in cows and feed is also 50 per cent. more than is necessary for one high producer."

Testing Cinder Deflector

Invention Of Montreal Man Being Tried Out By C.N.R.

Passengers in railway coaches should have no fear of hot cinders when they open windows of railway coaches if a new patented cinder deflector, being tried out on the London division of the Canadian National Railways, proves effective. The cinder deflector was invented by a Montreal man and was recently placed on engine No. 6148 on C.N.R. train No. 17, Montreal to Chicago. It attracted considerable attention. The deflector is a box-like device open at front and rear. It fits around the smokestack, catching the air and adding pressure to the smoke from the stack. The theory is that the force of the wind entering the device will be sufficient to lift all cinders high in the air with the smoke and keep them up until the train has passed under its own smoke cloud.

Making and selling toy balloons in the United States is a \$3,000,000 business.

Black and brown bears are still found over wide areas of this country from coast to coast.

Excellent Wheat Quality

This Year's Western Wheat Crop Of High Protein Content

Additional tests of the milling and baking qualities of the 1931 crop have confirmed earlier conclusions that this year's crop is equal, if not superior, to that of any year examined. The tests were conducted by Dr. F. J. Birchard, chemist in charge of the research laboratory of the Board of Grain Commissioners.

The weights per bushel of the first four grades are all higher than last year. The average weight for No. 1 hard is 65 1/2 pounds; for No. 1 northern, 65; No. 2 northern, 64 1/2; No. 3 northern, 62 1/2. With the increase in weight there is a corresponding increase in the percentage of flour in each grade. The average protein content is placed at 14.3 per cent. for the first four grades in Dr. Birchard's report.

"The baking quality of the first four grades is fully equal, if not superior to last year," says the report. "This is indicated by the very large volume and excellent texture of the loaves both when baked by themselves and when blended with typical soft wheats."

Attention is called to the relatively small percentage of wheat grading three northern or lower. Of the wheat passing through Winnipeg, 38.3 per cent. graded one northern, 34.1 per cent. two northern, 21.6 per cent. one hard, and only 4.5 per cent. three northern, and one percent. in other grades.

While the samples tested include wheat from the three prairie provinces, comparatively little from the northern sections of Saskatchewan and Alberta has been inspected. Heavy rains recently in those areas may affect the wheat.

An Accurate Record

A native assistant in an Indian hospital thus recorded the state of health of one of his patients on the chart which hung over the bed:

11:00 a.m.—Patient in low degree.
11:30 a.m.—Patient in the sink.
12 Noon—Patient on the flit.
12:15 p.m.—Patient out.

Many Diverse Applications

Divorce applications to the number of some 242 have been filed at Osage Hall, Toronto, so far this year. It was learned. Of this number 188 were applied for by wives and 109 by husbands. September was the high month for applications, 40 being recorded in that month.

More fires occur in winter than in summer, and there are more fires at night than in the day.

Industry Must Take Leading Part In The Battle Against Depression, Says Dr. Manion

Calling upon industrial and business leaders together with men and women in every walk of life to pool their intellects in evolving a permanent cure for economic depression, Hon. R. J. Manion, Minister of Railways and Canals addressed at Windsor, the convention of the Boards of Trade and Chambers of Commerce of Ontario. Civilization was being challenged; it was on trial and "it is the duty of all good Canadians to give serious thought to the whole matter to avoid our civilization going the way of civilizations in the past."

Communism was not the cure, Dr. Manion hastened to add. Unemployment, hunger and hardship formed fertile ground for the seeds of Bolshevism. "Our whole system of production and distribution is out of gear. That is why paid agents of Moscow are in our midst today, feeding upon discontent like evil birds of prey. These agents must be suppressed, for while our civilization has its faults, we can gradually correct those conditions without crippling or destroying our whole political and economic structure."

Notwithstanding its nature, any plan or policy to combat economic conditions must be contributory, continued Dr. Manion. The employee, the employer and the state must contribute. Without elaborating on it, the federal minister said one per cent. of all the wages and salaries paid annually in Canada, would amount to \$25,000,000. "What good Canadian," he added, "would object to contributing one dollar of every hundred dollars he earns to protect himself and his fellow Canadian from the tragedy of unemployment?" In some such manner, modified according to circumstances, an immense fund could be built up in the full years to protect us in the lean years.

Industry must take a leading part in the battle against depression, continued Dr. Manion. The Dominion, provincial and municipal governments were able to do only so much—after that point other agencies must enter the lists. For one thing, industry must change its tempo of production. "With industry the system in the past has been to go full blast ahead in prosperous years or seasons, utilizing to the full its large factories, marvelous machines and the human element, but when depression arrives, the industries slow down and the workers have to be cared for by

the state until the next period of prosperity arrives." The Dominion this year was spending about \$50,000,000 in caring for the unemployed and this could not continue indefinitely.

"If our political and economic system is to endure," said Dr. Manion, "the ablest minds in industry, commerce and public life must try to evolve the alternating peaks of prosperity and depths of depression, and industry must give its assistance to the fullest. We must, in other words, stop inventing industrial machines which take employment from the hands of the workers and try to develop 'instead' a social machine which will keep our people reasonably employed and so give us a contented and happy people. This is the best antidote to the poison of communism."

Dr. Manion closed his speech on a note of optimism. This country possessed immense natural resources, its banking system was strong and sound, the people were law-abiding; excellent ocean ports dotted the shorelines, unbounded commercial opportunities existed, particularly in the Orient and along the lines of preferential Empire trade. While this was not the time to "rock the boat" by capricious political criticism, likewise it was not the time to pay undue heed to "economic pessimists." There could be no doubt about Canada's future. "Its greatness is still to come."

Lambs From E.P. Ranch

Show Top Grade Form

Royal Ranch Has Done Much To Raise Standard Of Sheep Raising In Alberta

The Department of Agriculture at Ottawa has just received the formal report on the grading of 22 ram lambs under the Federal Ram Grading Policy. Of the lot 21 graded XXX or top grade. S. G. Freeborn, District Live Stock Promoter, who did the grading, states the lot were the best the E.P. Ranch has ever brought out. H.R.H. the Prince of Wales has been giving special attention for a number of years to the improvement of his ranch flock, importing high grade sires from British flocks, and going further afield to get rams with a view to improving fleeces as well as body type. Sales of graded ram lambs and other rams from the flock have done much to raise the standard for the breed in Alberta, and also to increase the popularity and worth of sheep raising as an industry, particularly in the West.

What Canada Spends

Annually On Pupils

Sixty-Six Dollars Approximate Sum For Each One

Schools and colleges of Canada teach, roughly, one-quarter of the country's population and are attended by 2,490,623 pupils, according to a report issued by the Dominion Bureau of Statistics. Each pupil involves an annual expenditure of approximately \$66, the total cost being \$165,361,198. An instructional staff of 83,144 teachers supervises the educational requirements of "Canada junior."

Provincially-controlled schools of general education embrace 2,166,878 and the privately-controlled 92,755 (omitting from the calculation the enrolment of the Roman Catholic schools of Quebec).

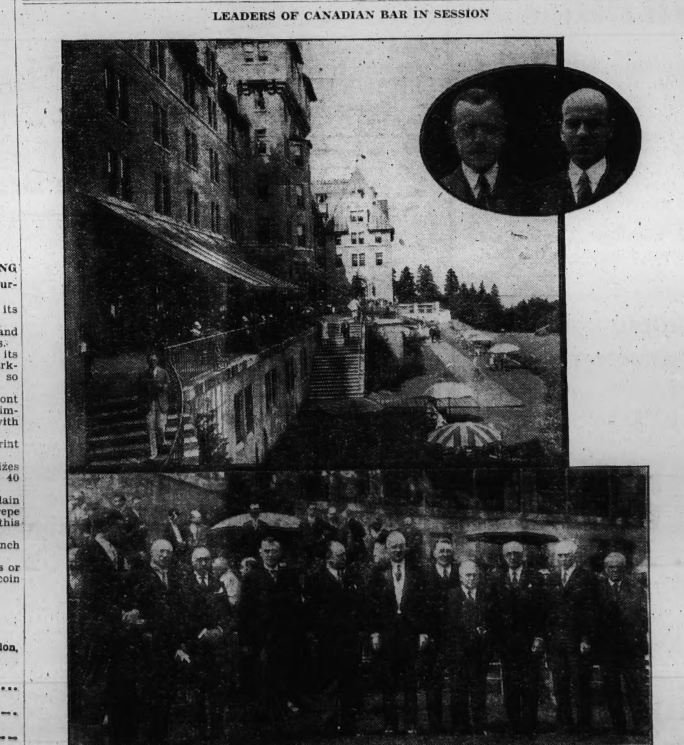

Has Ostrich Taste

When a three-year-old steer was slaughtered at Smithfield, London, England, recently, among the articles found in its stomach were seven pounds of rusty nails and screws, a silver knob, part of a rubber Wellington boot, part of a bowler hat, a shoe buckle and several pieces of copper wire.

Of 300 theatres in China, 65 are equipped with sound films.

"What! You want leave for your silver wedding? I will not grant it, or you will want leave every twenty-five years." — Fliegende Blätter, Munich.

From east and west Canada's leading barristers met at the 16th annual meeting of the Canadian Bar Association held during September at the Manoir Richelieu, Murray Bay, Quebec. Officially opened by His Excellency the Governor-General, the sessions were also attended by distinguished leaders of the bar from England, France and the United States. Photographs show: top view of the Manoir Terrace, during an informal gathering between business sessions; inset, Louis S. St. Laurent, K.C., Quebec, re-elected president of the Association, and E. H. Coleman, K.C., Winnipeg, re-elected secretary; bottom, a group of outstanding members and speakers photographed in front of the Manoir; left to right, Lord Duncannon, son of the Governor-General, Hon. Boston, president of the American Bar Association, Sir Lynden Macassey, K.B.E., K.C., London, England, Hon. N. W. Rowell, P.C., K.C., L.L.D., Toronto, and Mr. Justice Chipman, Halifax. Photographs by Can. Steamship Lines.

(By Gee)

E. L. Gray

BORN in Ontario, educated in the schools of Saskatchewan and at the Ontario Agricultural College, now field crops commissioner in the Alberta Department of Agriculture, E. L. Gray gives to his work as chairman of the Alberta Committee of the World's Grain Exhibition and Conference a wealth of agricultural experience.

Mr. Gray's home is in Grey County, Ontario, where he was born in 1895. In 1902 he moved to Saskatchewan with his parents and received his early education in the public and high schools of that province.

In 1923 he graduated from the Ontario Agriculture College, after which he taught school in Saskatchewan for three years. He served overseas during the war with the C.E.F. and for a time acted as a county agricultural agent in Ontario. His agricultural experience was greatly increased during the period he occupied the position of farm manager and instructor in animal husbandry at the School of Agriculture, Claresholm, Alberta, and for nearly three years as district agriculturalist at Hanna, Alberta.

(By Gee)

J. Wilfred Boulter

BROUGHT up on a farm in Prince

Edward Island and for many years closely associated with educational work, J. Wilfred Boulter, Deputy Minister of Agriculture for P.E.I., has a long record of association with agricultural activities. He is secretary of the Prince Edward Island committee of the World's Grain Exhibition and Conference.

Tryon is Mr. Boulter's birth place. He was reared on a farm and received his early education in that district. For about eight years he taught school, a part of which time as principal of the first consolidated school in Prince Edward Island.

In 1907 he was a public school inspector and in 1918 was appointed Deputy Minister of Agriculture. Two years later he was appointed manager of the Potato Growers' Association, organized in 1920.

Mr. Boulter's other public activities include a directorship of the Standard Wholesale Phosphate and Acid Works, of Baltimore, Maryland; secretary of the Charlottetown Driving Park and Provincial Exhibition Association; secretary of the Provincial Dairyman's Association, and secretary of two black fox farm companies.

**The Wastebasket**

"Ah, your steak is like the weather this evening, rather raw," remarked a boarder to his landlady here during an exchange of pleasantries. "Yes, and your board bill is like the weather, too, rather unsettled," she replied.

"Boo hoo, he threw a biscuit at me, and one that I had made, too," moaned a recent bride here to her mother, concerning her husband. "The brute," exclaimed her mother, "he might have killed you."

"You came into my life like a ray of sunshine," said an Irma fellow to his new Jarrow girl. "And I'm going out of it like a streak of lightning," she replied.

A little girl on returning home from Sunday school here was asked by her parents what she had learned that day. "God made the world in six days and was arrested on the seventh," was her startling version of the lesson.

"They are a very devoted couple," said a local lady to her husband about some new neighbors that located in an adjoining residence. "He kisses her every time he goes out and when he comes in again, and waves kisses to her from down the street; why don't you do that?" "Hang it all," her husband replied, "Give me a little time. I don't even know her yet."

SODIUM SULPHATE DEPOSITS IN WEST

An investigation of the sodium sulphate deposits in Western Canada, under present, arid climatic conditions, was recently completed by L. H. Cole, of the Department of Mines, Ottawa, and F. V. Seibert, Winnipeg, Superintendent of Natural Resources for the Canadian National Railways. A report on these deposits, made by Mr. Cole, indicates the presence of more than 115,000,000 tons of hydrous salt, mainly sodium sulphate, in the West. At the present time, a plant is under construction at Whiteshore Lake, on the main line of the Canadian National Railways, about 90 miles West of Saskatoon. The product plays a vital part in the pulp and paper industry, glass manufacturing, nickel refining, textile dyeing, tanning, and in various other chemical industries.

Alberta Judge Sits in Scottish Court and Answers Questions about Viking

Much has been written of the "long arm of coincidence," and it is quite possible that many of us have had strange coincidences. Some of these are more interesting than others, and some stranger than others.

In the list of coincidences there is one which Mr. Justice Ford of the supreme court of Alberta experienced. It is a most interesting one in the particular circumstances. It does not often happen that a judge from Alberta finds himself sitting on the bench with a judge in far away Edinburgh, Scotland. But what is singular not only took place but with it what is more singular, as will be seen in the relating of the incident.

Mr. Justice Ford was visiting Edinburgh, which is his wife's native city, in 1927, and going to the court received a courtesy invitation from the late Lord Constable, a well-known Scottish judge and advocate, to sit on the bench with him at what is known in Scotland as the Court of Session. It was a session of the court for hearing motions and applications from members of the Scottish bar, and Mr. Justice Ford was quite unaware of what was on the list. An application was made for the removal of a man from the trusteeship of an estate in Scotland on the ground that he was absent from the country.

Mr. Justice Ford was not particularly interested in the proceedings until the point arose as to whether the particular trustee had time to reply to a letter mailed him. Much to his surprise, Lord Constable, the trial judge, knowing he was from Canada, turned to him with the question: "Do you know Viking in Alberta?" He replied: "It is next door to us." Mr. Justice Ford has his home in Edmonton. "How long," asked the Lord Constable, "would a letter take to reach Viking?" On receiving the reply he turned to the advocate making the application and said: "I have judicial authority that there has not been time enough to hear from Viking." It was not only strange that Mr. Justice Ford should have known Viking, but, stranger still, that he happened to know personally the man who was being discussed in Edinburgh court where he was casually a visitor and sitting on the bench. —Lethbridge Herald.

Undisputed Queen of the Pacific**PACIFIC OCEAN RECORDS**

How New Times Compare With Old:

			DAYS	HOURS	MIN.
Yokohama to Vancouver	4280 miles	Empress of Japan	8	3	18
		Empress of Canada	8	10	53
Vancouver to Honolulu	2329 miles	Empress of Japan	4	15	50
		Previous Record	5	13	50
Honolulu to Yokohama	3379 miles	Empress of Japan	6	9	43
		Empress of Canada	7	6	11

Kobe to Yokohama

333 miles

Empress of Japan 15hrs 54m

Previous Record 19hrs.

Smashing record after record: the beautiful 26,000-ton Canadian Pacific liner "Empress of Japan" holds an established reputation as the queen of the Pacific Ocean, both in speed and comfort. Her latest accomplishment, on her last 4,280-mile trip, east-bound from Yokohama to Vancouver, was to complete her journey in 8 days, 3 hours and 18 minutes, thus beating her own previous record by 3 hours and 10 minutes. Apart from this she holds records

between Vancouver and Honolulu; Honolulu and Yokohama and Yokohama and Kobe. The last-mentioned record is considered the ship's best speed performance in Japan's history. The commander of this great White Empress, Captain Samuel Robinson, indicated after her last trip that she has still more power in reserve and may well hang up another record in the near future.

To Bring Bermuda Next Door

Already the winter playground of many Canadians, Bermuda will be brought even closer to Canada by the inauguration, January 31st, of a weekly sailing from New York by the Canadian Pacific liner Duchess of York.

The island—or, to be correct—the 365 coral islands that form Bermuda in addition to being the closest summer-weather resort to Canada is famous for lilacs, golf and bathing.

Canadian professionals from Toronto and Hamilton are familiar faces on two of the many fine

courses of which Bermuda boasts, and excellent bathing both on beaches and in open-air sea-water pools is a feature.

Pictured above are: (1) Captain R. N. Stuart, V.C., D.S.O., commander of the Duchess of York.

(2) Coral rock formation on the coast showing the Duchess of Bedford en route to the West Indies.

(3) The open-air swimming pool, which is a feature of the Hotel Hamilton, Bermuda's largest hotel.

(4) One of the many caves.

Your Needs In Printing

WHEN BUSINESS IS QUIET

When there is a quiet time as at present in usual business, a good chance is afforded merchants and others to check up their requirements for the year, place orders and have them completed in readiness for the hurry up periods. This is especially true of your printing and we venture to draw your attention to our well equipped plant.

VIKING

A number of the members of the Elks Lodge of which Rev. A. L. Bee was a valued and active member, held a social farewell gathering in his honor in the Elks hall last Thursday evening. All the brethren present voiced their appreciation of his work in the lodge and expressed genuine regret at his removal from the community on account of poor health. Rev. Bee left on Monday for his former home in the Motherland where he expects to take charge of a parish. Good wishes for a speedy return to health and a safe and happy voyage went with him. He was presented with an emblem of the lodge as a token of esteem and high regard in which he was held by the fellowmembers of the lodge.

The Ladies of the W. A. of the Anglican Church held a farewell party in honor of the Rector, Rev. A. Loydall-Bee, last Tuesday evening, October 27th at the home of Mrs. Gillespie. Games were enjoyed and several humorous readings given by Mrs. Meredith which were much enjoyed by all present.

A dainty lunch was served at 11.30 by the ladies after which Mrs. Walters, President of the W. A., in a few well chosen words presented the Rector with a lovely cut glass vase as a small token of love and appreciation from all. A beautiful poem on "Friendship" accompanied the gift. The Rector was much pleased and acknowledged the gift in his usual kindly manner after singing "For he's a jolly good fellow," and "God Save the King," the happy evening came to a close.

Last week grain was coming in so fast to the local elevators that they were practically all filled up and a car shortage occurred. The Secretary of the Viking Chamber of Commerce immediately on being advised of the situation sent a wire to the freight superintendent of the C. N. R. at Edmonton and on Monday 41 cars were spotted on the siding here, with promise of more to come. It was quick service on the part of the Canadian National and it is thoroughly appreciated by all concerned.

There was a large crowd at the auction sale held at the F. C. Cleverdon farm seven miles northwest of town on Monday. It is estimated that there were over five hundred in attendance, coming from all neighboring districts. We understand that everything was sold except the land, which if not sold in a short time will be rented to responsible parties. A. A. Long, local auctioneer, was assisted by W. G. Smith, Edmonton, and they were pretty well worn out at the end of the day by the arduous labors. Fair prices were realized.

Hallowe'en in town was not without its acts of hooliganism although not reaching the condition of former years. Why young men will stoop to such acts is something that puzzles the average citizen. This year they even used the hi-jacker method of transporting outbuildings by truck from one part of the town to another, also moving other property by the same method. Some property damage is reported. It is rather puzzling to the authorities as to what to do with these Hallowe'en jamborees, but it is mooted that an example should be made of parties that persist in this nefarious practice, with a view of stopping it as far as possible. Generally an whole gang is mixed up in an affair of this kind and to get all the guilty parties corralled is another thing. The town authorities endeavor to have ample police protection, but it seems that most depredations are made at a very late hour, or rather when it is expected that the night has been far spent. It seems that appeals to the good sense of the Hallowe'en celebrants are without avail. However, at all costs, the practice must stop.

The town hall was filled Wednesday evening with hockey fans and hockey players for the reorganization of the Viking hockey club. The following slate of officers was elected:

Honorary president, H. G. Thunell; president, R. J. Darrah; vice-president, W. Dean; manager, Percy Main; coach, A. Adell; assistant manager, Dr. B. W. Richardson; finance committee, W. McAthey, C. G. Purvis, Ken Hilliker.

Plans are on foot to enlarge the hockey rink and make some improvements that will increase the interest and also make for better accommodation for the spectators. Prospects for a fast team are bright. "Bob" Darrah, captain of the University of B.C. hockey team last year, is spending the winter here and will be a strong addition to the team. Members of last year's team who will turn out for practice are the three McAthey brothers, Dr. Richardson, Harland and Ken Hilliker, Harry Lawes and Ormond Horton, besides other prospects.

The high school expects to put two teams in the field, besides the Shoppe-Rite store, and the Gas team from the Gas field, playing under the name of Mooseville.

FACTS OF INTEREST

By the end of November, 1931, over 28,000 head of cattle will, it is expected, have been exported from Canada to Great Britain. Weekly shipments for some time past have averaged from 1,000 to 1,200 head, according to records of the Canadian National's Car Service department at Winnipeg.

CHINESE LILLIES HERALD
APPROACHING YULETIDE

Heralding the approach of Yuletide, ten carloads of Chinese lily bulbs and holly were recently shipped over Canadian National Railways from the Pacific Coast to cities throughout Canada and the United States. First harbingers of Christmas, the fragile bulbs will be planted by tender hands wherever the spirit of Santa Claus prevails and, by December 25th, the lovely white flowers will blossom to and beauty to seasonal festivities.

RAILROAD MAINTAINS
A WEATHER BUREAU

So concerned are the Canadian National Railways with the vagaries of wind and rain, cloud and sunshine, heat and cold, that they maintain their own weather bureau. Every eight hours, day and night, clicking telegraph keys report to divisional headquarters throughout Canada, "what's doing" in the way of weather. The reports determine the temperatures of refrigerator and heater cars and also determine the crop yields to be hauled to market by the railroad, so that, months before harvest time, nearly 40,000 grain cars can be distributed throughout the Prairies to handle the grain movement. Track repair work is likewise affected and the loading of trains depends on the weather since a sudden cold snap reduces by as much as thirty per cent, the tonnage a locomotive can pull.

CANCER

Each of the various tissues of the body is made up of its own special type of cell, all coming from one parent cell. Under normal conditions these cells increase in number by dividing; they grow, they mature and they die. In some manner—how, we do not understand—this growth of the cells is regulated and controlled.

When this control is lost or when it becomes disorganized, it is apparent then that growth occurs which, in some cases, is dangerous or malignant. Why and how this happens we do not know. What appears to be the case is that cancer arises in the normal cells of the body. It is, as it were, growth run wild. Many theories have been advanced to explain the occurrence of cancer, which is another way of saying that there is no theory which is satisfactory or which is generally accepted. The disease is not hereditary. In any disease which as common as cancer, several cases may occur in one family, but, as far as we know, this is not due to heredity, nor has it been proven that any particular diet has any influence on cancer.

Chronic irritation of some kind is frequently followed by cancer. The irritation may be mechanical, such as is caused by broken teeth or poorly fitting dental plates. The irritation may be due to chronic inflammation, such as is seen in the female generative organs, particularly in the cervix or lower part of the uterus. The stomach may be chronically irritated through abuse, and the lower bowel as a result of constipation.

Our present knowledge brings us to say that in so far as prevention is concerned, all we do is to avoid the types of chronic irritation mentioned above. The mouth should be kept healthy, and the stomach free from abuse. Constipation must be avoided, and any chronic inflammatory condition corrected by proper treatment.

In its early stages, cancer is a local disease. If, during that stage, it is completely removed or destroyed, a cure is possible. The periodic health examination by the family physician allows for the early detection of cancer, and this is one reason why such regular examinations are advocated.

Many deaths which now occur from cancer could have been prevented had the cases come under treatment early. It is the delay which is disastrous. Sores which do not heal readily, indigestion after forty years of age, discharges from the body, lumps in the breast—none of these signs should be neglected. Life itself depends upon giving attention to these warning signals. The condition may not be cancer, but if it is, treatment should be secured at once.

NEWS FROM BRUCE
AND DISTRICT

Driving in the moonlight, without lights on the way to the Bruce Chautauqua, on Tuesday evening a week ago, a Ford Truck piloted by Joe Haber, crashed into a wagon loaded with potatoes and vegetables. The wagon was driven by Mrs. Fred Teske accompanied by her three young children. The children were uninjured, but Mrs. Teske was taken to the Viking hospital suffering from shock and injuries to the back. The wagon gear crumbled with a broken rear and pole irons, but the quiet horses proved further damage by standing still.

The driver of the truck, which was badly wrecked, was unhurt. Other occupants of the truck were Miss Freda Babilitz and Mr. Fred Babilitz of Newbrook. Mr. Fred Babilitz tangled in the windshield and emerged with a badly battered countenance and severe cut over the right eye. He was taken by friends to Dr. S.J. Farrell of Holden where he received medical attention.

Later, on Thursday, in Magistrate I. A. Millar's court in Bruce, the driver of the truck paid fines of fifteen dollars and five dollars with costs, on two counts, reckless driving and failure to report the accident to the police.

After being a respected citizen of Bruce for eighteen years, Wo Lee (Old John) left on the flyer Thursday evening, sailing from Vancouver on Tuesday for his old home, Parkash, Hoy Sun, Canton, China.

Last Wednesday afternoon Miss Annie B. Stewart, the popular school-marm of West Bruce school took her scholars to the Bruce Chautauqua where they were introduced to Sue Hastings' Marionettes. The children are still talking about Peter Rabbit and the wonderful way he shakes his tail. Miss Stewart and Mrs. Jack Parfett conveyed the children with cars, from the school to Bruce and home again after the show.

On Friday afternoon West Bruce school was the scene of a Hallowe'en party for the children. The school was decorated in black and orange with pumpkins, brownies and witches symbolic of the occasion. Among other games, bobbing for apples was the most attractive. Several took a ducking and came up with "shining morning faces." Prizes were captured by Arthur Ham and Kathleen Lamb.

Games, dancing and a taffy-pull featured the Hallowe'en party of the Bruce Community Club in the Bruce Hall, Friday evening. The hall was decorated for the occasion in Hallowe'en splendor. Mr. Allen was master of ceremonies. Mrs. Gaudet supervised the taffy-making, and Mrs. Barker, Frank Ratke and Doris Frederick supplied the music.

Mr. and Mrs. Fisher and child from Gadsby were visitors at the home of Mrs. Sam Gordon last week.

Mr. Fred Babilitz who has been visiting his brother Mr. Hulbert Babilitz over threshing, has returned to the security of his homestead at Newbrook, where he intends to den up for the winter.

Born, at Viking Hospital last week, to Mr. and Mrs. John Noel of Bruce, a daughter.

The Chautauqua at Bruce this season was not a distinct financial success and left the guarantors out of pocket. The committee refused to guarantee returns for another year, so it would appear that Bruce is through with Chautauqua.

Last Saturday evening, in the gymnasium of the Bruce school, Mr. Hergott's senior class entertained their friends, and the trustees and their wives at a Hallowe'en party. The guests had the run the quintlet of a "spook room," where in the dark, weird ghosts performed their antics. Mr. Hergott was assisted by Mr. Allen. Games and refreshments completed an interesting evening.

FIRST INVENTIONS IN CANADA

The recent death of Thomas A. Edison recalls the fact that he, like Alexander Graham Bell, inventor of the telephone, proved his first invention in Canada. Edison as a youth was a telegraph operator in Canada for the Grand Trunk Railway (now the Canadian National) and it was while so employed at Stratford that he perfected his first invention. It is an interesting coincidence that almost at the same time and only a few miles away at Brantford, Ontario, Alexander Graham Bell was developing his telephone over which the first conversation was held between Brantford and Paris, Ontario, on August 10, 1875.

If you have something valuable that you don't want and somebody else can use it, an ad. in this paper will sell it for you. Try it.

LOST 20 LBS. FAT Without Altering Diet

To reduce weight without any attention to diet is rather more than anyone should expect. That the Kruschen method should have succeeded in this case, is a great tribute to its effectiveness.

"When I started taking Kruschen for reducing weight, I weighed 170 lbs. That was seven months ago. I decided I was too heavy, and now, thanks to the half teaspoonful of Kruschen every morning, I tip the scale at 150 lbs. I have been that weight for nearly four months. I may say I feel much better. I did not diet myself in any way whatever."—E. C.

Kruschen Salts do not reduce you overnight—like so many products claim to do. But taken regularly over a period of time—with a modified diet and gentle exercise, half a teaspoonful in a glass of hot water every morning before breakfast will take away unhealthy flesh and restore your figure to its normal weight. Yet at the same time—build up health with a great increase in vigor and energy for you!

WORLD HAPPENINGS BRIEFLY TOLD

Calgary's nine months' revenue report shows collections \$140,000 above the same period last year.

More than \$9,000,000 is to be spent on harbor development at Canton, China.

About 242 divorce applications have been filed at Osgoode Hall, of which 133 were filed by wives.

An increase in the value of meat and most products exported from Canada for September is shown by the Dominion Bureau of Statistics.

Some 400 persons have been given employment in New York selling telephone service and extensions on commission.

Not a drop of rain has fallen in the Lorca district, near Murcia, Spain, for over seven years, and the peasants are imploring the Government's help.

Estimates that the Australian wheat crop will be 20 per cent. smaller than last year have been received at the agriculture department, Washington.

Increased activity is reported in many Lancashire and Yorkshire cotton mills as a result of an influx of orders since the gold standard was suspended.

The New York American, quoting "an informed source," says the late Senator Dwight W. Morrow, of New Jersey, left an estate of "close to \$20,000,000."

According to the official census taken in June, Ottawa has a population of 124,985, or an increase of 15.90 per cent. in ten years. The 1921 census gave Ottawa a population of 107,843.

A special cable from London to the New York Times announces the death in Bournemouth, England, of General Sir Reginald Hart, 83. Sir Reginald was the oldest holder of the Victoria Cross, which was awarded him in the Afghan war of 1879.

Separate Grade For Garnet Wheat Asked

May Be Excluded From Contract Grades Of Northern Classes

Garnet wheat will be excluded from the contract grades of the northern classes after July 31, 1932, if a resolution passed unanimously by the Western Grain Standards Board is approved and the Canadian Grain Act duly amended at the next session of parliament.

The resolution urged that it be graded as a separate variety of wheat in grades to be known as number one, two and three Garnet, with anything which fails to meet the requirements of these grades being included in the lower grades of the red spring wheat.

Aviators flying at night through the high-walled gorge of the Columbia River, are now guided for 50 miles by red and green beacon lights.

"My mother is kind, she promised me a doll yesterday and gave it to me today."

"That is nothing—my mother promised me a little brother and today she gave me three."—Il Travasso Rome.

W. N. U. 1913

Worry and Fear

Factors That Help To Shorten the Span Of Life

The way that hate, fear, worry and jealousy have helped to choke off at 58 years man's hitherto rapidly increasing span of life, was described to the American College of Surgeons in New York.

The bank president worrying over business, the criminal suddenly stricken with fear and the mother watching her sick child all were pictured as doing the same injury to their health.

This increase to 58 as the average time every adult may expect to live was discussed by two internationally known physicians, Dr. George W. Crile of the Cleveland Clinic, and Dr. Charles H. Mayo, of the Mayo Clinic of Rochester, Minn.

Dr. Crile told the medical story of ravages of emotions of modern civilization. Dr. Mayo sketched remedies for ill health, which included newspapers as "the greatest educating, thought-moulding enterprise in the world."

By Annette

CROSS-OVER LINES TEND TO MAKE THE FIGURE APPEAR SLIM

You'll love this silk crepe shantung in powder blue and white. It's so extremely serviceable. Its moulded lines with wrapped arrangement through the bodice makes it especially desirable for the woman inclined to overweight. The surplice shawl collar of plain white crepe does its bit toward minimizing breadth.

It's simplicity itself to copy it! The bodice cuts in one until it joins the skirt.

It's a splendid opportunity! Choose now! You'll be delighted with this smart model.

Style No. 931 may be had in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 3½ yards of 35-inch contrasting.

Charming for this model for town or resort are the pastel flat crepe silks, Chinese silk damask, linen and shirting fabrics.

Pattern price 25 cents in stamps or coin (coin preferred.) Wrap coin carefully.

Men, Not Gold

Arthur Brisbane, a United States editorial writer, comments on the flying performances of the British Lieutenant Stainforth who made a mark of 386 miles per hour, and says: "A nation that can make such airplanes and find men to run them ought not to be discouraged about a few million pounds sterling one way or the other. It is what men have in their brains that makes a country."

BRITISH "BOBBIE" STRIVES FOR LAW AND ORDER

This lively scrimmage is far more reminiscent of what is expected of Red Russia than of usually staid, peaceful London, but such scenes as this battle between a London policeman and several marchers in an unemployment parade, have become frequent in the British capital as demonstrations increase over prevailing economic conditions. The policeman was trying to tear a red banner from the hands of the struggling marchers as this picture was snapped in exclusive Oxford Street, London, England.

China Becoming Modern

Western Mode Of Living Is Being Gradually Adopted

That China is rapidly narrowing the gap of centuries between its antiquated mode of living and modern civilization has been evidenced in many ways. The Chinese student is avid for Occidental knowledge and may often be seen mingling with enthusiastic graduates at Columbia and other universities. The Oriental nation has realized the healthful benefits of wheat at a most opportune time and is now becoming a new consumptive market for 15,000,000 bushels of surplus wheat from the Federal Farm Board's stocks, which it recently purchased on a long-term credit basis. Nor is the health of the modern Chinese baby being neglected. The best milk and butter that registered Ayshire cows can produce will attend to this necessity, for the Hong Kong Dairy and Cold Storage Company has placed an order with the British Columbia Ayshire Breeders' Association for 50 head.

The New Honey Grades

Canadian Standard For Honey Provide a Natural Classification

The consuming public are showing a special interest in the attractive appearance and convenient identification of quality which is made possible by the new honey grades, which come into effect this year. Where honey is sold by grade the grading must conform to the Canadian standards. The Canadian standards for honey provide a natural classification by colour into the four classes "White," "Golden," "Amber," and "Dark." These classes in turn are graded strictly on the quality basis as "Fancy," "Choice" or "Manufacturers." The honey grades are especially popular because of the consistency of the application of grade terminology to the product when graded, the inherent quality of the honey literally speaks for itself.

Must Buy At Home

The woman of Turkey's officialdom must turn their eyes from the mode of Paris and buy their gowns at home, the cabinet has decided. The edict against foreign ra'iment applies even to President Mustapha Kemal, who must forego his London tailor's services. It's all part of a national economy programme.

Wife (to husband who has fired at rabbit just as chimney is felled): "Oh, John, dear, look what you've done now!"—The London Opinion.

Increased Postal Revenues

Substantial Recovery Is Noted By Postmaster General

Substantial recovery in postal revenues, with every prospect of last year's deficit being overtaken, is indicated in reports of postal business presented to Hon. Arthur Sauve, postmaster-general. Since assuming that portfolio, Mr. Sauve has applied himself industriously to the task of converting a heavy deficit into a surplus and recently expressed satisfaction with the result, which promises well for the future.

One feature of the increased postal business is the marked advance in third-class mail matter. "If this conveys anything at all," declared one official, "it suggests that business houses and industrial concerns have greatly widened their advertising campaigns. Third-class mail embraces printed matter—circulars and such like. The doubling of this business in September indicates a pronounced confidence on the part of merchandising houses in the gradual betterment of conditions generally."

Lending support to this is the 15 per cent. increase in registered mail during September. Second-class mail matter has retained its position, while a slight drop in letter mail is more than offset by increases in other directions.

For the first three months of the fiscal year the department was \$900,000 in "the red" from last year, but the months of July and August overtook \$800,000 of that, and from now on officials look for a steady upswing.

Young Jap Is Independent

Eleven-Year-Old Boy On Long Trip Shows His Mettle

Pride runs high in the Japanese and it gets its start at an early age. Young Mr. Haruo Inouye, 11-year-old Japanese boy, who travelled alone from Toronto to Vancouver via Canadian National Railways, possesses a fiery independence that rose in protest when a representative of the Traveller's Aid remarked that Haruo looked no more than eight years old.

"You're goofy," was the young Oriental's cryptic reply. Master Inouye decided to take a walk around Winnipeg before the Continental Limited steamed on west, and, when the passenger agent, whose charge he was, left momentarily, he nodded in the direction of the uniformed official and said: "Tell the president not to worry. I'll be back."

Haruo's father is dead and now his guardian, with whom he lived in Toronto, has also passed beyond, so the independent little lad was on his way to join an elder brother in Vancouver. He accepted words of sympathy with a shake of his head, a flashing smile and terse, "Guess I'm fixxed, but I'll get along."

Don't cry over spilt milk; hustle around and get some more milk tickets.

The most vicious and despicable of human vices is insisting upon minding other people's business.

Dean Inge says true fasting is eating something you don't like. Many children feel that way about spinach.

THE HOUSE OF DREAMS-COME-TRUE

— BY —
MARGARET PEDLER
Author of
"The Splendid Folly," "The Hermit of Far End,"
Hodder & Stoughton, Ltd., London.

CHAPTER IV.—Continued.

Jean, always sensitive to her surroundings, shivered a little.

"It's rather eerie, isn't it?" she said. "It's just as if someone had suddenly turned the lights out."

"Quite a nice bit of symbolism," he returned enigmatically.

"How? I don't think I understand."

He laughed a little.

"How should you? You're young."

Fate doesn't come along and snuff out the lights for you when you are—what shall we say? Eighteen?"

"You're two years out," replied Jean composedly.

"As much?" Then let's hope you'll have so much the longer to wait before Madame Destiny comes round with her snuffers."

He spoke with a kind of bitter humour, the backwash surely, of some storm through which he must have passed. Jean looked across at him with a vague trouble in her face.

"Then, do you think," she spoke uncertainly—"do you believe it is inevitable that she will come—sooner or later?"

"I hope not—to you," he said gently.

"That she comes to meet of us."

She longed to put another question, but there was a note of finality in his voice—a kind of "thus far shalt thou come and no further"—that warned her to probe no deeper. Whatever it was of bitterness that lay in the Englishman's past, he had no intention of sharing the knowledge with his chance companion of a day. He seemed to have become absorbed once more in his own thoughts, and for a time they tramped along together in silence.

The ascent steepened perceptibly, and Jean, light and active as she was, found it hard work to keep pace with the man's steady, swinging stride.

Apparently his thoughts engrossed him to the exclusion of everything else, for he appeared to have utterly forgotten her existence. It was only when a slip of her foot on the beaten surface of the snow wrung a quick exclamation from her that she paused, wheeling round in consternation:

"I beg your pardon! I'm walking off your legs! Why on earth didn't you stop me?"

There was something irresistibly boyish about the quick apology. Jean laughed, a little breathless from the swift climb uphill.

"You seemed so bent on getting to the top in the least possible time," she replied demurely, "that I didn't like to disappoint you."

"I'm afraid I make a poor sort of guide," he admitted. "I was thinking of something else. You must forgive me."

They resumed their climb more leisurely. The trees were thinning a bit now, and ahead, between the tall, straight trunks winged with drooping, snow-laden branches, they could catch glimpses of the white world beyond.

Presently they came out above the pine-wood-on to the edge of a broad plateau and Jean uttered an exclamation of delight, gazing spell-bound at the scene thus suddenly unfolded.

Behind them, in the pine-tinged valley, a frozen reach of water gleamed like a dull sheet of metal, whilst before them, far above, stretched the great chain of mountains, pinnacle after pinnacle, capped with snow,

thrusting up into the cloud-swept sky. Through rifts in the cloud—almost, it seemed, torn in the breast of heaven by those towering peaks—the sunlight slanted in long shafts, chequering the snows with shimmering patches of pale gold.

"It was worth the climb, then?"

The Englishman, his gaze on Jean's rapt face, broke the silence abruptly. She turned to him, radiant-eyed.

"It's so beautiful that it makes one's heart ache!" she exclaimed, laying her hand on her breast with the little foreign turn of gesture she derived from her French ancestry.

She said no more, but remained very still, drinking in the sheer loveliness of the scene.

The man regarded her quietly as she stood there silhouetted against the skyline, her slim, brown-clad figure striking a warm note amid the chill Alpine whiteness and greys. Her face was slightly tilted, and as the sunshine glinted on her hair and eyes, winking the russet lights that shimmered in them, there was something vividly arresting about her—a splendour of ardent youth which brought a somewhat wistful expression into the man's weary eyes of the man watching her.

His thought travelled back to the brief snatch of conversation evoked by the sudden gloom of the pine-woods. Surely, for once, Fate would lay aside her snuffers and let this young, eager life pass by unshadowed.

Even as the thought took shape in his mind, Jean turned to him again, her face still radiant.

"Thank you for bringing me up here," she said simply. "It has been perfect."

She stretched out her hand, and he took it and held it in his for a moment.

"I'm glad you've liked it," he answered quietly. "It will always be a part of our day together—the day we stole from the conveniences"—he smiled whimsically. "And now, if you can bring yourself back to more prosaic matters, I suggest we have lunch. Scenery, however fine, isn't exactly calculated to sustain life."

"Most maternal!" she laughed up at him. "I suppose you think a ham sandwich worth all the scenery in the world?"

"I'll admit to a preference for the sandwich at the moment."

"Acknowledged. 'Come now, confess! Aren't you hungry, too?'"

"Starving! This air makes me feel as if I'd never had anything to eat in my life before!"

"Well, then, come and inspect my sale a manager!"

The proposed refuge proved to be a roughly constructed little hut—hardly more than a shed provided with a door and thick-paneled window, its only furniture a wooden bench and table.

But that it had served its purpose as a kind of "travellers' rest" was proved by the fragments of appreciation, both in prose and verse, that were to be found inscribed in a species of "Visitors' Book" which lay on the table, carefully preserved from damp in a strong metal box. Jean amused herself by perusing the various contributions to its pages while the Englishman unpacked the contents of his knapsack.

The lunch that followed was a merry little meal, the two conversing with a happy intimacy and freedom from reserve based on the reassuring knowledge that they would, in all probability, never meet again. Afterwards, they bent their energies to concerting a suitable inscription for insertion in the "Visitors' Book," squabbling like a couple of children over the particular form it should take.

So absorbed were they in the discussion that they failed to notice the perceptible cooling of the temperature. The sun no longer warmed the roofing of the hut, and there was a desolate note in the sudden gusts of wind which shook the door at frequent intervals as though trying to attract the attention of those within. Presently a louder rattle than usual, coincident with a chance pause in the conversation, roused them effectually.

The Englishman's keen glance flashed to the little window, through which was visible a dancing, whirling blur of white.

"Great Scott!" he exclaimed in good round English. "It's snowing like the very dickens!"

In two strides he had reached the door, and, throwing it open, peered out. A draught of icy air rushed into

CHILD need REGULATING?

CASTORIA WILL DO IT!

When your child needs regulating, remember this: the organs of babies and children are delicate. Little bowels must be gently urged—never forced. That's why Castoria is used by so many doctors and mothers. It is specially made for children's ailments; contains no harsh, harmful drugs, no narcotics. You can safely give it to young infants for colic pains. Yet it is an equally effective regulator for older children. The next time your child has a little cold or fever, or a digestive upset, give him the help of Castoria, the children's own remedy. Genuine Castoria always has the name:

Wm. H. Fletcher
CASTORIA
CHILDREN CRY FOR IT

the hut, accompanied by a flurry of fine snow driven on the wind.

When he turned back, his face had assumed a sudden look of gravity.

"We must go at once," he said, speaking in French again and apparently unconscious of his momentary lapse into his native tongue. "If we don't, we shan't be able to get back at all. The snow drifts quickly in the valley. Half an hour more of this and we shan't be able to get through."

Jean thrust the Visitors' Book back into its box, and began hastily repacking her companion's knapsack, but he stopped her almost roughly.

"Never mind that. Fasten that fur thing closer round your throat and come on. There's no taking chances in a blizzard like this. Don't you understand?"—almost roughly.

"If we waste time we may have to spend the night here."

Impelled by the sudden urgency of his tone, Jean followed him without any of the hut, and the wind, as though baulked by her haste, snatched the door from her grasp and drove it to with a menacing thud behind them.

(To Be Continued.)

Honor Canadian Doctors

Westerners Appointed To Governing Body Of American College Of Surgeons

Dr. W. Edward Galle, professor of surgery at the University of Toronto, was elected a vice-president of the American College of Surgeons, meeting in the next annual meeting.

Installed as vice-president was Dr. Ross Miller, director of medical sciences of the Department of Pension and National Health, Ottawa.

Dr. J. Bentley Squier, of New York, was elected president and will take office at the 1932 annual congress.

Among those elected to the Board of Regents was Dr. Robert E. McKeechie, of Vancouver, B.C.

A group of more than fifty prominent surgeons of North and South America will take office at once on the Board of Governors. They include Dr. Ambrose L. Lockwood, of Toronto; Dr. Hugh MacLean, of Regina, Sask.; Dr. Alexander Monroe, of Calgary, Alberta, and Dr. William Harvey Smith, of Winnipeg.

The congress has a system of election whereby at the same congress at which the incoming officers are inaugurated, officers for the following term are elected.

Mothers can easily know when their children are troubled with worms, and they lose no time in applying a reliable remedy—Mother Graves' Worm Exterminator.

Simple When You Know

Last month saw the New Yorker, a gentleman got his bill from Hamacher, Schlemmer's. He hadn't bought much there the previous month; only one item was listed, but that one item puzzled him exceedingly. It was "1 gr F H Bt Ir Wd Scs—0.45." He puzzled over this for some time, and got nowhere; finally just for the sake of his peace of mind, he called the store and asked them please to explain what it meant. Simple matter. It meant: "One gross flat-headed bright iron wood screws."

English is displacing French as the first foreign language taught in many Prussian schools.

Gasoline is being sold in Germany at 40 cents a gallon.

Duck Carries Band For Nine Years

Valuable Information Regarding Habits Of Birds Obtained Through Banding Method

On the first day of the 1930 open season for black duck in the province of New Brunswick, a resident of Joliette brought down a banded black duck which had been winging its way over marsh and river for more than nine years. Proof of this is the fact that the bird was wearing band No. 5180, which is one of the official bands used by the National Parks of Canada Branch, Department of the Interior, Ottawa, and the United States Bureau of Biological Survey at Washington, D.C., which co-operate in conducting bird banding as a means of collecting scientific data concerning wild birds. Band No. 5180 was placed on this black duck by H. S. Osler, K.C., at Lake Scugog, Ontario, on September 15, 1921. Could it be related the story of the duck's adventures and how it managed to escape all hazards for over nine years would be an interesting one. Much valuable information concerning the migration, range, and longevity of many species of wild birds is being obtained by the banding method. Any person who finds a banded bird is requested to help with this important work by reporting the details to the Commissioner, National Parks of Canada, Department of the Interior, Ottawa.

Experience Is Limited

United States Has Not Learned Secret Of Lending

Before the war, England conducted the great bulk of the world's trade with a trifling gold stock, and she took care to prevent an accumulation of it by free lending abroad. But though the United States has £1,000,000,000 of gold she is doing nothing with it, and unconsciously is thereby helping to accentuate and prolong the depression in world trade, from which she is now suffering as acutely as any other country.

A limited experience as a creditor country, and it may appear to her that she cannot advantageously lend to bad debtors. Debtors more urgently need assistance when things are bad than when they are good. Bad though their position may be it will become worse unless they are helped. Debtor countries are by no means blameless, but the responsibilities of creditors are not less grave than those of debtor countries.—Financial Page, London Times, England.

Persistent Asthma. A most distressing characteristic of this debilitating disease, is the persistence with which recurring attacks come to sap away strength and leave the sufferer in a state of almost continual exhaustion. No wise precaution can be taken than that of keeping at hand a supply of Dr. J. D. Kellogg's Asthma Remedy, famous as the most potent remedy for eradicating the disease from the tender air passages.

Held Record As Brickmaker Nine million bricks have been made by Mary Foxall of Lye, Worcestershire, England, in the sixteen years she has been at the occupation. She has been the county's record, which she achieved by maintaining an average of six hundred and fifty bricks a day.

At all events, Gar Wood and Kaye Don broke even in regard to the brevity of their names.

Receiving Title Did Not Change Sir Thomas Lipton

Samuel Smiles never had a clearer self-made man than Thomas Lipton. The boy to whom a guinea used to be a fortune became the master of millions and the employer of hosts of men. He was generous with his money, never more so than in the World War, when he turned the Erin into a hospital ship; and Serbia knew him as "Uncle Tom." His motto was "Labor Omnia Vincit." A friend of the early Glasgow days said of him: "He did not need to be knighted to be a nobleman."

Get Acquainted First

Wife.—The couple next door seem to be very devoted. John. He kisses her every time he goes out and when he comes in, again, and waves kisses to her from down the street. Why don't you do that?

Hubby.—Hang it all, give a man time. I don't even know her yet.

Russia's Policewomen

Moscow, Russia, is one of the few cities of the world to boast of uniformed policewomen on regular beats. They wear helmets, and, attached to a belt over their olive-drab jackets, is a pistol in a leather holster.

Increase of 18 since last year and of 180 since 1922. Rural mail carriers throughout the country number 4,258.

Don't Gamble With Health

We all know health demands absolute inner cleanliness. But what we often don't realize is the risk we take when we use harsh, gripping purgatives that create a strained, unnatural condition.

ENO is pleasant, gentle, safe and sure.

A daily dash of ENO'S "Fruit Salt" in a glass of water, morning or night, tones up and sweetens the entire system. Acid stomach, fatigue, biliousness, quickly disappear.

ENO'S "FRUIT SALT"

A Birthday Party

Birthday Cards To Be Sent From Royal Winter Fair

Every boy and girl in Canada whose tenth birthday falls between November 18 and 26, inclusive, will receive a personal birthday card from the Royal Winter Fair, Toronto, if it is requested. This is because the winter fair on those dates also celebrates its tenth "birthday."

This year the fair is designated a "commemorative show" to recall the inspiring influence it was to Canadian agriculture when founded ten years ago. And it is to help in spreading a cheery outlook respecting agriculture that the birthday party is being held.

Many children die from the assaults of worms, and the first care of mothers should be to see that their infants are free from these pests. A vermifuge that can be depended on is Miller's Worm Powders. They will not only expel worms from the system, but act as a health-giving medicine and a remedy for many of the ailments that beset infants, relieving them and endangering their lives.

Marked by Him who loves these best;

Secret of a happy day.

Secret of His promised rest.

—Frances Ridley Havergal.

If you go to Him to be guided, He will guide you; but He will not comfort your distrust or half-trust of Him by showing you the chart of all His purposes, concerning you. He will only show you into a way where, if you go cheerfully and trustfully forward, He will show you on still farther. No contract will be made with you save that He engages, if you trust Him, to lead you into the best things all the way through.—Horace Bushnell.

Species Is Unknown

Petrified Fish Found In Gravel Pit Near Moose Jaw

Mute testimony of the belief that the prairies were once covered by many fathoms of water is borne in the finding of a petrified fish of an unknown species, in a gravel pit, three miles south of Moose Jaw.

Carl Erickson, working at the rock pile was smashing a huge rock of 500 or 600 pounds when he came upon the "fish." It was right in the centre of the huge rock which had been dug up from a depth of about eight feet underground.

This relic of a distant age resembles the snail and is about the size of a man's fist.

The agent drives it 400 miles while demonstrating, and it's still a new car. They tour drive it home and it's a used car, worth \$800 less.

Keep on your Feet

4 MORE ACTIVE DAYS

Was Always a Nobleman

Receiving Title Did Not Change Sir Thomas Lipton

Samuel Smiles never had a clearer self-made man than Thomas Lipton. The boy to whom a guinea used to be a fortune became the master of millions and the employer of hosts of men. He was generous with his money, never more so than in the World War, when he turned the Erin into a hospital ship; and Serbia knew him as "Uncle Tom." His motto was "Labor Omnia Vincit." A friend of the early Glasgow days said of him: "He did not need to be knighted to be a nobleman."

Get Acquainted First

Wife.—The couple next door seem to be very devoted. John. He kisses her every time he goes out and when he comes in, again, and waves kisses to her from down the street. Why don't you do that?

Hubby.—Hang it all, give a man time. I don't even know her yet.

Russia's Policewomen

Moscow, Russia, is one of the few cities of the world to boast of uniformed policewomen on regular beats. They wear helmets, and, attached to a belt over their olive-drab jackets, is a pistol in a leather holster.

Increase of 18 since last year and of 180 since 1922. Rural mail carriers throughout the country number 4,258.

When BAN Comes

WHAT many people call indigestion very often means excess acid in the stomach. The stomach nerves have been overworked, and food sours. The corrective is an alkali, which neutralizes the acids instantly. And the best alkali known to medical science is Phillips' Milk of Magnesia.

One spoonful of this harmless, tasteless alkali in water neutralizes instantly many times that much acid, and the symptoms disappear at once. You will never use crude methods when once you learn the efficiency of this. Go get a small bottle to try.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 30 years in correcting excess acids. 50c a bottle—any drug store. (Made in Canada.)

W. N. U. 1913

Could Not Check the Summer Complaint A Few Doses Did It

Mrs. R. Coulter, 918-11th Ave. E., Calgary, Alta., writes:—"Last summer my youngest son, who was but a year old, was very sick, and everything he ate he would vomit, and he got so thin I became very much worried. I could not get the discharge checked, so I went to the drugstore and he gave me a bottle of Dr. Fowlers' Extract of Wild Strawberry, and told me it would stop the trouble if anything would. After I had given him the first few doses I noticed the discharge was being checked, and he was not long before he was well again."

Every Month She's "Sick Again"

Too bad! Sick again... doubled up with cramps. The boss was nice... awfully patient.

But it was so embarrassing... everybody in the office knew that she was "sick" again.

Then a girl friend told her what to do. You need Lydia E. Pinkham's Vegetable Compound. It's a wonderful medicine to use during these "trying times."

It peeps you up. Drives away those headaches. Keeps you on your feet. Won't you try a box of the new tablets?

Lydia E. Pinkham's

Read the Ads in the Times

Main Street

We are glad to report that Mrs. Shaw is improving nicely.

The Novelty table at the Bazaar on Saturday, November 7th will be a real attraction this year.

Be sure and take in the Ladies Aid Bazaar on Saturday, November 7th at the Irma United Church.

Mrs. R. Smallwood is attending the U. G. G. convention in Calgary this week.

Mrs. Hardy and Mrs. Greenberg motored to Vegreville and back on Wednesday.

Miss Gilhooly spoke to the mothers in the church Saturday afternoon and to the teen age girls in the evening.

Jack and Helen Wilson returned to their home in Edmonton on Tuesday after assisting Mr. Love with the honey during the summer.

The play, "The Family Upstairs", to be put on by the Viking Young people on behalf of the Irma Ladies Aid, on Friday, November 13th will be a real treat. Don't miss it.

Roy Burton is confined to his bed with pleurisy and threatened pneumonia. We hope to hear a good report of Roy shortly.

Mrs. Thomas Bannion and Mrs. Harry Judd who have been visiting their sister, Mrs. Pryce Jones returned to their home in Hayter, Alberta.

Mr. W. H. King's grandson, Junior, who has been staying with his grand parents since his return from the hospital, has had a slight attack of tonsillitis. We are sorry to report.

The Roseberry and Alma Mater Ladies Aid will hold a chicken supper and sale at Roseberry School on Friday, November 20th. Admission: Adults 25c; children 15c.

About twenty friends and neighbors gathered at the station to bid good bye and best wishes to Miss Clara Sellars on Wednesday morning when she left for her old home in Mitchell, Ontario from where she will be married and go on to her new home near Buffalo, New York.

The congregation at Albert are holding a fowl supper on Friday, Nov. 13th at 6:30 p.m., to be followed by a social evening in which pictures of the Oberammergau Passion Play will be shown. The admission charge is 35c for adults and 10c for children of school age.

IRMA SCHOOL

BOARD MEETING

The Board of Trustees of the Irma School District No. 2435 met on Monday evening, November 2nd, being regular meeting of the month. All members present.

Moved by Mr. Peterson that the minutes of October 5th be approved as read. Cd.

Moved by Mr. Peterson that the account of the United Grain Growers, coal \$83.35 and Irma School Fair \$300 be passed and paid. Cd.

Discussion re rebate on taxes. Mr. Peterson stated on behalf of the Rural ratepayers some rebate should be extended to them as the date for the rebate being September 15th was not a suitable date or time for the rural ratepayers and suggested that a percent to be agreed upon should be extended to December 1st on current taxes thus bringing in a large amount of arrears which would mean a reduction in the mill rate for 1932.

Moved by Mrs. Schonert that the Secretary write the Department of Education asking if it is permissible to allow a rebate of 5 per cent on 1930 taxes if paid by December 1st, 1931. Cd.

Moved by Mrs. Schonert that Board adjourn. Cd.

A Worn Out Tractor

Is a poor machine to try and get your crop threshed with. The Massey-Harris Co., have on hand some real Tractor Bargains. Think of it. Tractors that have only done one season's work and have been thoroughly overhauled in their own shop by their own workmen and repainted. Fully guaranteed and selling at from \$600.00 to \$800.00.

The real value of these Tractors is at least \$1,000. But they are being offered at this Exceptionally Low Price to clear the stock.

Better see your agent at once before they are all sold. V. HUTCHINSON, Blacksmith Massey Harris Agent Phone 12, Irma

Jarrow Pioneer Passed Away

On October the 29th the death occurred of Mr. Erland Vernon Lindquist at his home four miles south of Jarrow. Mr. Lindquist was a native of Sweden, Sweden. Born on the 14th of August in the year 1863, he emigrated to the States in 1892 and located a homestead in the Jarrow district in 1912 where he resided until the time of his death.

He leaves to mourn his loss, besides his wife, three sisters and two brothers in Sweden, and one brother Oscar of Jarrow, also three daughters, Edith (Mrs. Martin Jacobs of Killam) Olga (Mrs. Bruer Nyblom of Viking) and Helen, at home, and four sons, Erland of Killam, Peter of Viking, and Vernon and Isaac at home; also seven grand children.

The funeral took place from the United Church in Jarrow to the Jarrow cemetery on Sunday, November 1st, and was one of the largest ever held in the district. Rev. Taylor conducted the service and six of his old time neighbors acted as pallbearers, viz. Elmer Erickson, R. S. Lissac, Olaf Larson, P. Hardy, G. Comley, and W. Comley.

Mr. Lindquist was an active member of the Valley Springs U. F. A. Local No. 77. His home was the central gathering place for the community and everyone was sure of a welcome at all times. His place is one that will be hard to fill, and his removal means the loss of a loving husband, a kind father, a good neighbor and a loyal citizen. The many beautiful floral tributes is some indication of the esteem in which he was held.

Besides the family wreath was a wreath from the Valley Springs U. F. A. Local No. 77; a wreath from Mr. and Mrs. Oskar Steffensen, and sprays from Brother Oscar, Mr. and Mrs. Albert Johnson, Erland Iva and children; Peter, Margaret and Baby Olga Bruer and Elvie; Martin, Edith and Family; Killam Lodge No. 76 I. O. O. F.; Mr. and Mrs. Olaf Larson; Jarow U.F.W.A.; Mr. and Mrs. Carl Larson; Mr. and Mrs. Elmer Erickson; Mr. and Mrs. N. L. Fuder; Mr. and Mrs. M. T. Knudson and Family; Mr. and Mrs. A. Fickson and Family; Mr. and Mrs. Robert Kaaten; Mr. and Mrs. R. S. Lissac and Family; M. and Mrs. W. Groner; The Jarow Community Club, and Mr. and Mrs. Barton.

The sympathy of the entire community goes out to the family in their bereavement.

NEWS ITEMS FROM JARROW

The Hallowe'en Tea held in the Red & White store on Saturday by the school children was a decided success in every way. The room was very prettily decorated and the little girls made charming waitresses in their Hallowe'en caps and aprons. The home made candy and taffied apples soon disappeared and the fortune telling was well patronized. The sum of \$13.50 was cleared which will be used to purchase books for the school library.

Mrs. Dolan of Chauvin has been visiting her brother Mr. Cochlin this week.

Mr. George Dawson of Irma visited with his sister Mrs. Pest this week.

Mrs. Paull returned home after visiting in Edmonton at her parents for a few days.

Mrs. E. Williams is in Lamont hospital where she underwent an operation last week. We are glad to report she is doing nicely and will soon be home.

Mrs. Love of Wainwright visited at the Williams home this week.

Miss Kay Dolan who has been visiting here for the past month went to Islay on Sunday where she will stay for some time.

Hannah Gustafson returned from Viking hospital last Friday where she has been receiving medical attention.

Threshing is practically finished in this district and most of the outfits are home.

The regular monthly meeting of the Ladies Aid will be held on Thursday next, November 12th at the home of Mrs. N. S. Johnson. All the ladies of the congregation are cordially invited to attend.
